

Business Formation

Our Associates Are Here To Help You Start Your Business

Corporation Associates helps new business owners start their dreams by providing the guidance needed so that you have the resources for success.

A new business needs many things. Start with business or corporate filings, city license, resale permit, and IRS FEIN. Next, you will need a website, business plan, marketing plan, and sales process.

The type of business that you start will determine how many legal contracts that you will need to have created. A simple cash transaction still has terms and conditions. You will want to have a lawyer with retail experience draft the terms for you.

Do you manufacture? If so, does it make sense to purchase or lease the machinery needed to make your product. A financial review will help you determine the best course of action.

Are you going to resell a product? Clothing, electronics, gifts, and so forth. If you are a retailer, have you setup your supply chain? Who do you buy from. Have you negotiated best price? What about terms?

Corporation Associates Business Formation Group is here to help you with starting your new business. Call today and let's begin the conversation.

Planning for your business

Start planning for your business by answering some basic questions. Will I form a sole proprietorship, partnership, or corporation? Will I hire right away or will I be the only employee? Will I need an office or retail location or will my business be online only?

Additional points to consider:

- Do I work at customer locations?
- Do I need company vehicles?
- How much insurance do I need?
